INVENTORY OF LIGHT POINTS (CONNECTED SOLUTION)

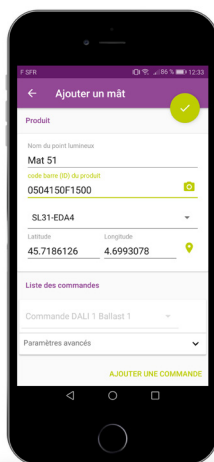

1

Create your project
Name your cabinet and position it

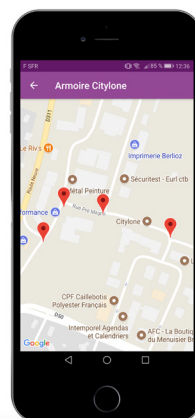

2

Create your light points:
- GPS self-positioning
- barcode scanning
Specify your settings and manage your light points.

3

Send the configuration file
You're done!

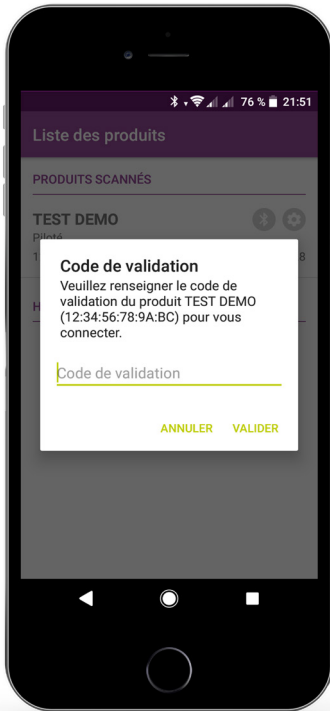

Convenience: a complete file with all the information needed to oversee your commissioning is automatically created!

VIEW AND CONFIGURE LOCAL SOLUTIONS

1

Access security

Choose your product and enter the validation code to access the overview and configuration.
A PIN code will be required to change the configuration.

2

Configuration and overview

View the existing system.
Perform overrides.
Configure your system:

- midnight scheduling
- detection parameters (angles, duration...)
- nominal and economical level

3

Send

Send the configuration to the product in the cabinet and it will then be transmitted throughout the lines.

You're done!
